SKILLS

- Android Studio (Java , Kotlin)
- Xamarin, Visual Studio
- (C#,VB,Asp.net) IOS Mysql ,
- Sql server, Oracle, MongoDB
- , Firebase
- NodeJS, Python
- Javascript, PHP
- HTML, CSS Github, Azure
- devops Bubble.IO, Zappier,
- Zoho,supbase, AI grok,
- Mapbox, Next.js,tailwind
- xano,n8n,make,highlevel

EDUCATION

BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY

Holy Cross of Davao College
2011 - 2015

EXPERIENCE

BUBBLE DEVELOPER

Conserva Care LLC
Feb 2025 - December 2025

- Strong understanding of Bubble's editor, data architecture, workflows, responsive design, and plugin ecosystem.
- Able to debug complex workflows, identify root causes, and implement effective fixes.
- Creating and exposing REST APIs in Xano to support secure, efficient communication between Bubble and external systems
- Experience mapbox location api, AI grok for checking details for client requirements
- data sync from bubble to xano , using canvas template

EXPERIENCE

WEB DEVELOPER
Post Recruitment
May 2024– January 2025

- Proficiency in Bubble.io: Skilled in using Bubble's visual editor, responsive engine, custom states, reusable elements, and conditional logic.
- Creative UI/UX Thinking: I bring a creative mindset to designing user interfaces that are clean, modern, and intuitive.
- Strong Problem-Solving: Known for being detail-oriented and fast at diagnosing and resolving issues in workflows, APIs, or layout behavior.
- Plugin & API Configuration: Experienced in setting up third-party plugins and integrating RESTful APIs through Bubble's API Connector, including authentication handling and custom header/body configurations.
- Testing & Debugging: Dedicated to thorough testing across breakpoints, browsers, and devices to ensure clean, bug-free releases.
- Self-Motivated & Reliable: I take initiative, work independently, and consistently meet deadlines with minimal supervision.

.NET DEVELOPER
DCBank
Freelance

- Work closely with database administrators and the rest of the development team to ensure that accuracy and performance of systems are
- maintained. Manage and maintain multiple applications including support, configuration, documentation, testing and upgrade with a strong focus on change management processes.
- Support customers and end users, and work with the rest of the development team to resolve application issues.
- Set up user accounts and assist with the maintenance of test, development and training environments for critical applications.

EXPERIENCE

BUBBLE DEVELOPER

MVP.Dev

February 2022 – April 2024

- Design, develop, and deliver applications on the Bubble.io platform (training provided)
- · Ensure the best possible performance, quality, and responsiveness of applications
- · Identify bottlenecks and bugs, and devise solutions to these problems
- · Help maintain code quality, organization, and automatization
- · Technical customer support for various platform issues
- · Other programming tasks that may arise, including working with no-code platforms
- Setting up secure connections with OAuth2, Bearer tokens, or API keys,
- Parsing dynamic JSON responses,
- Creating backend workflows for automated data exchange and synchronization between platforms.

MOBILE DEVELOPER (IOS/ANDROID)

Accenture Inc.

May 03 2020 –December 15 2021

- Assigned to the application development and maintenance.
- Responsible solely to the development of the whole project. I did the ordering system, inventory, sales and development of the android application for admin.
- Recheck fixes and issues whenever an update is available.
- Analyzes data and checks whether the data complies to existing industry and practices.

BACKEND DEVELOPER

One Corp

August 2016 - December 2019

- Responsible solely to the development of the whole project. I did the Record Management for Visual studio(C#)
- Assigned to the application development and maintenance.
- I developed "E-hatud" app using Cordova for web and Xcode, and Android Studio for mobile.
- Resolved difficult problems, improved operations and provided exceptional client services.
- Developed Payroll Management System using PHP and Mysql, and for leave and attendance using Android.

SYSTEMS DEVELOPER

Technology Innovation Inc.

September 2015 - February 2016

- Responsible solely to the development of the whole project. I did a "Barangay System".
- Developed the project using Visual studio (C# , SQL server and MySQL).
- I was assigned to the application development and maintenance.
- Worked closely with clients to establish specifications and system designs.
- Provide client support.
